- Bootstrap
- JavaScript
- Material UI
- React, Redux
- Github
- RESTful APIs

Muhammad Mohsan Khan

Junior software engineer

WORK EXPERIENCE

intern Software Engineer

2023 - 2024

Big Entities | Arfa Software Technology

At BigEntities, I work on various frontend and dynamic projects. I Developed the BigEntities website using HTML, CSS, Bootstrap, and JavaScript. Additionally, I worked on the FieldForce website, leveraging ReactJS and Bootstrap for a modern, user-friendly interface. Furthermore, I work on developing the FieldForce Dashboard, a dynamic website that manages and simplifies field operations through the use of Redux, ReactJS, and APIs.

PROJECTS

1). BigEntities Website

- **Technologies:** HTML, CSS, Bootstrap, JavaScript

Project Description

Developed and maintained the company's main website, ensuring a responsive and user-friendly interface. Implemented modern design principles to enhance user engagement and optimize loading speeds.

2). FieldForce Website

Using ReactJS and Bootstrap, a comprehensive website was created for the FieldForce application. focused on creating an architecture that is both scalable and maintainable while maintaining smooth user interactions and cross-browser compatibility.

3). FieldForce Dashboard

- **Technologies:** ReactJS, Redux, Material UI

The FieldForce Dashboard is a dynamic web portal designed specifically for managing and optimizing the workflow of medical representatives.

Admin Side: The admin interface allows managers to efficiently assign tasks, track progress, and analyze performance metrics of medical reps.

Medical Reps Side: Medical representatives can access their personalized dashboard to receive task assignments, update their progress, and manage their schedules.
